

AI-NATIVE OUTCOME OPERATIONS

From fragmented enterprise data to continuously operated outcomes.

Human Managed is an AI-native operational intelligence company. Our platform, (s)eyark.ai, transforms high-volume enterprise data into a persistent understanding of current state, desired state, behaviours, relationships, risks, and operational gaps across cyber, risk, and digital environments.

From that foundation, HM generates intelligence, recommends decisions, coordinates execution, and takes authorised action. Every step is evidence-backed, explainable, confidence-rated, and auditable.

THE HM INTELLIGENCE AND OUTCOME OPERATING SYSTEM

THE INTELLIGENT SURFACE

A shared operational surface for customers, HM operators, and AI agents that continuously answers:

WHAT EXISTS? Assets, identities, entities, services, and dependencies.	WHAT CHANGED? Current state, historical shifts, and active behaviours.	WHAT MATTERS? Priority, business context, risk, and likely impact.	WHAT IS MISSING? Blind spots, stale data, weak evidence, and uncertainty.	WHAT NEXT? Recommended decisions, owners, controls, and timing.	DID IT WORK? Outcome verification and continuous state feedback.
--	--	--	---	---	--

I.D.E.A. — THE SERVICE OPERATING MODEL

OPERATED OUTCOMES

ESTABLISH AND MAINTAIN EXPOSURE VISIBILITY Continuously discover, classify, enrich, and relate enterprise assets and controls.	REDUCE TIME FROM SIGNAL TO DECISION Turn high-volume telemetry into contextual, prioritised, and explainable intelligence.	COORDINATE INCIDENT RESPONSE Move from detection through investigation, execution, remediation, and verification.	DETECT ABNORMAL BEHAVIOUR Identify fraud, insider risk, threat activity, and operational anomalies across entities and transactions.
--	--	---	--

NOT ANOTHER DASHBOARD OR AI ASSISTANT.

HM creates an intelligent operating surface through which people and machines can understand what is happening, decide what should happen next, and verify whether the intended outcome was achieved.

PLATFORM SCALE

6 PB+ DATA MANAGED	3B+ EVENTS PER DAY
100K+ ASSETS MODELLED	500+ DATA STREAMS
50+ CONNECTED SOURCES	50 TB+ PROCESSED MONTHLY

DOMAINS

-  **CYBER:** SecOps, exposure, threat intelligence, incident response, MDR.
-  **RISK AND FRAUD:** Fraud analytics, insider threat, behavioural intelligence.
-  **DIGITAL OPERATIONS:** Asset intelligence, environment visibility, operational state.

ENGAGEMENT MODEL

- 1

FOUNDATIONAL
Platform explains. Human decides and executes.
- 2

ADAPTIVE
Platform recommends paths. Human selects and executes.
- 3

AUTONOMOUS
Full I.D.E.A. cycle within customer-authorised scope.

TRUST AND DELIVERY

- ISO/IEC 27001:2022
- SOC 2 Type II
- Singapore CSRO licences for Managed SOC and MDR
- 24/7 operations across Asia
- Registered entities across six countries
- Founded 2018. Headquarters in Singapore.

ARCHITECTURE PRINCIPLES

- Data-first and persistent state by design
- Model-agnostic across commercial, open-source, and private models
- Tech-agnostic and modular with no tool lock-in
- Evidence-backed, confidence-rated, explainable, and auditable
